

Clinical Conductor Study Build Services

Expedite Study Activation with Clinical Conductor Study Builds

Advarra's team of study build experts deliver high-quality study builds and forms in Advarra Clinical Conductor, utilizing best practices in data capture and form design. By leveraging our standards-based approach and system expertise, your organization can get the most out of your Clinical Conductor system.

Why Utilize CC Study Build Service?

Get Time Back

With limited bandwidth to create study builds, many sites end up with a backlog of protocols to build. Advarra's Clinical Conductor Study Build helps sites boost productivity and reassign resources. Study Builds are completed directly in your Clinical Conductor Clinical Trial Management System (CTMS), enabling quick and compliant study activation.

Free Up Internal Resources

Eliminate the need to hire and train an internal team on the very specific skillset needed for interpreting protocol documents and building out studies.

Rapid Turnaround

Standard processes provide fast, reliable turnaround times.

Improve Adoption

Lowers the barrier of technology experts required for study setup while improving technology adoption.

Ensure Accuracy

Sites don't have to rely on staff to make judgment calls on the protocol independently, which:

- Eliminates confusion and misinterpretation
- Increases protocol compliance
- Minimizes deviations

Comprehensive Services Include:

- Reviewing protocol and budget documents
- Building the visit and procedure schedule, inclusive of visit windows for subject visit management and scheduling
- Adding the negotiated budget inclusive of costs for each procedure, visit, protocol-related events, subject stipends
